

Product Overview

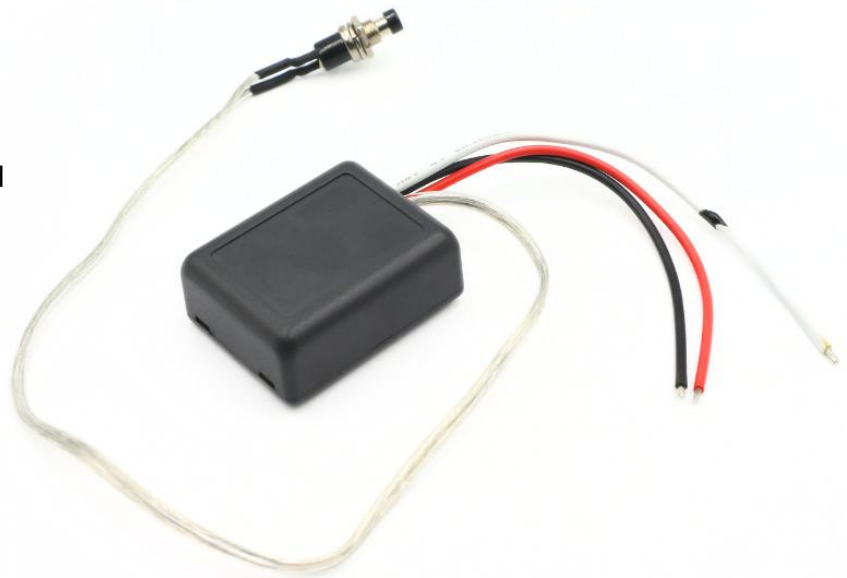

The **CAB-MINI-HK** is a Harman Kardon amplifier enabler cable for selected **Mini R50, R52 and R53** vehicles fitted with the original **Boost CD radio** and factory **Harman Kardon amplifier**.

Please Note

- This cable is not plug and play, professional install recommended

Common locations:

- Behind radio

Tools Required

- Trim panel removal tools
- Screwdriver / bolt set
- Wire cutters / strippers
- Crimping or soldering tools
- Loom tape

Installation Steps

1. Switch off the ignition and remove the key.
2. Remove the original radio to access the factory radio wiring.
3. Locate the radio loom / connector. (refer to image)
4. Insert or connect the **white data wire** from the CAB-MINI-HK into the shown position on the radio loom.
5. Connect the **red wire** to a **12V ignition feed**.
6. Connect the **black wire** to the vehicle **chassis ground** or a confirmed ground wire.
7. Connect the aftermarket stereo wiring as required.
8. Mount the button in a suitable accessible position.
9. Secure the wiring, making sure it is not trapped, stretched, or near moving parts.
10. Refit the radio and any removed trim.

Button operation

The button is used to control the Harman Kardon mode functions.

Depending on the version supplied, it may be used to adjust the fader and access different HK sound modes, such as driver or spatial modes.

Testing

1. Switch on the aftermarket stereo.
2. Check that the Harman Kardon amplifier switches on.
3. Play audio and confirm sound is heard through the vehicle speakers.
4. Use the button to check the HK mode/fader function.
5. If there is no sound, recheck the white wire position, 12V ignition feed, ground connection and vehicle compatibility.
